

LED Accent Spot & Flood lights FOR Retail

INTRODUCING THE **iPAR-38™**
WITH **POWERBAND™** TECHNOLOGY

VARIABLE BEAM ANGLE **TRIOTRAC™** LED LIGHTING FIXTURE

Simply Unbelievable

This long anticipated 10 watt LED accent / spot / flood light exceeds the light output and zonal lumen of the halogen 75 watt in head to head testing. Our iPAR-38 has a CBCP up to 19,500 yet it consumes energy like a **nitelite**. It's dimmable, giving off virtually no heat, saving you 80% on your energy costs and lasts over a decade burning at retail for 12 hours a day. It can spot displays, wall art and merchandise as well as light the environment anywhere from 10' to 40' with clean, correct light.
